### A New Kind of Sideways Reviews

"I fell completely and unapologetically in love with it"

- Prog-Watch

"There's no doubt about it, this is a spellbinding album. It brilliantly taps into the visceral emotional rawness of our present circumstances with a musical elegance and grandeur that is both compelling and magnificent."

- The Progressive Aspect

"A New Kind Of Sideways is a tour-de-force of technically proficient, but more importantly totally accessible modern prog rock with all the classic traits, it's magnificent. 9/10"

- Musipedia of Metal

"Ambition will always pay off in the end and KEPLER TEN have done just that. In A New Kind of Sideways, the planet has borne witness to a truly exciting outfit, one that could easily be world-class if the pieces fall together in the right way. The best thing is that they can go better than this; they're only just getting warmed up..."

- Distorted Sound Magazine

"...moments of such stellar song writing that you feel like you've heard that section before, except you haven't, it's just a really well written piece of music that is so well put together, it sounds welcoming to your brain. Kepler Ten have written an entire album full of those moments, and it's bloody spectacular... a future classic which has a much wider appeal than just the prog rock listeners. Absolutely recommended to everyone." 9.5/10

- DPRP

"A breathtaking experience"

- Malcolm Dome - Prog Magazine

"A tremendous slab of polished progressive tinged songs."

- At the Barrier

"...short songs, long songs, and a twenty-minute, three-part closing piece that brings us full (musical) circle ensures that like a quality chocolate selection there's something for everyone's tastes here, in the best possible sense... stirring stuff" - 9/10

- Powerplay Magazine

"Just as the lyrics allude to in that final track, every element of Kepler Ten's music are links in the chain; a chain fitting of many things as they're a band who can shift up for high-flying romps, and back down for more emotional

contemplation, something that A New Kind of Sideways was literally built on.”  
- Everything Is Noise

“Heavy guitars playing complex riffs within intricate songs arranged in dynamically composed movements per the art music style, layers of organic and synthesized harmonies, and a premium placed on fine melody.”  
- Last Rites - USA

Nominated in the Limelight category of Prog Magazine’s Prog Awards 2017 for Delta-v.
